

This report shows a schedule of pending site removals; there must be a replacement site requested (see <https://cms.unl.edu/request-a-site/>) in Next-Gen CMS (Drupal 10) prior to the date noted, or the site will be archived and moved offline on or after that date. The Drupal 7-based UNLcms will enter its final shutdown phase on Dec. 12, and will be fully shut down on Dec. 19, 2024.

Of 821 sites in Drupal 7, 171 have been moved to Next-Gen CMS and are now live. (There are 638 sites under development in Next-Gen CMS); 384 sites in D7 have now been "parked" in maintenance mode.
