

This report tracks progress of sites in Next-Gen CMS. It is separated between not-live and live sites (not-live sites go first); within those groups, sites are sorted by the length of time since the last edit date recorded for a site; the longest dormancy periods appear first.

There are 2 days remaining until the shutdown process for Drupal 7 begins on Dec. 12, 2024. All D7 infrastructure will be permanently taken offline on December 19, 2024.

A new version of this report will be posted to Slack weekly, on Tuesdays, until Dec. 12.
